About the University

1.0 The University Background :

The National Policy on Education (NPE) 1986 emphasized that distance education is an important medium for the development and promotion of higher education. In this context, for the expansion and promotion of distance education the Central Advisory Board of Education (CABE), Government of India took an important decision that in the VIIIth year plan every State should establish a State Open University(SOU) following the distance education mode. On this basis Madhya Pradesh Bhoj (Open) University (MPBOU) was established under an Act of State Assembly in 1991 with the following objectives.

- To Extend and expand Higher Education by reaching the un-reached through various flexible means suited to the Open and Distance Learning (ODL) mode using emerging information and communication technology.
- To promote national integration and the integrated development of human personality for the well being of the community.
- To determine/maintain standards and promote Distance Education.

1.1 Special Features:

- Providing education to the doorsteps of the learner for easy accessibility.
- Flexibility in the system for wider coverage.
- Providing equitable access of quality education for different target group of learners irrespective of their age or status of employment.
- Freedom to the learners to study at his/her own pace and convenience.
- Opportunity to learner to study from his/her own chosen location.
- Omnipresent Education using emerging communication technologies.
- Sustainable intervention to develop, upgrade and recycle human resource for areas critical to national development including the well being of the community.
- Determination of standard and maintenance of quality in Distance Education in accordance with DEC norms.

The University mainly delivers training and education through distance mode in the form of flexible and open learning. In general, the system consists of a main campus activity in the form of curriculum development, generation of self instructional material, preparation of assignments and extending student support services. The head quarter of the University which manages and operates the Distance Education Programmes is situated at **Raja Bhoj Marg (Kolar Road) Bhopal.**

2.0 Department Of Multimedia Education (DME)

The main functions of the DME are to undertake academic activities pertaining to three major areas :

3.0 General Information about the M.Ed. Programme :

The M.Ed. Programme designed and developed jointly by the Distance Education Council (DEC), and National Council for Teacher Education (NCTE) is a two year programme. It is adopted and offered by Madhya Pradesh Bhoj (Open) University. It is an innovative programme, using Self-Instructional Materials (SIMs) and Information and Communication Technologies (ICTs) along with an interactive personal contact programme component. To effectively impart instruction, the programme follows the multimedia approach which includes print materials, audio-video programme, teleconferencing, assignments, reflective activities, counseling sessions, personal guidance for research, contact programme, individual and group activities and EDUSAT etc.

The purpose of programme is to prepare quality teacher educators and educational administrators who have developed a global as well as a national vision for education in the modern

concept of the 21st century. Further, it seeks to prepare educational experts capable of generating knowledge by the application of scientific method of inquiry or investigation, and to develop a critical mind which can find solutions to problems relating to the theory and practice of education.

3.1 Programme Rationale :

This is a professional programme and, therefore, it focuses on comprehensive and integrated professional development of teachers, teacher educators and other personnel engaged in educational management, administration and teacher education.

The main objective of the programme is to develop competencies and skills among the teacher educators so that they share the responsibility with confidence to prepare teachers for diverse situations by using the various methodologies with a focus on ICT. The programme is, therefore, intended to address professional areas of concern, knowledge, skills and attitudes relating to teaching and learning. This covers a number of professional areas like educational and vocational guidance and counseling, ICT enabled education, environmental concerns, education for human rights and values, gender concerns, etc.

The other focused areas include the role of teachers in changing global socio- economic concerns, organization of teacher education in the country, understanding teaching in a comparative perspective, thus meeting the requirements of "education for all" and "training for all" and preparing teachers to meet the challenges of the 21st century.

3.2 Objectives of the Programme

The programme aims at preparing teacher educators and other personnel in education who are specialized in different areas of education with necessary knowledge, understanding, skills attitude and values, which can make them truly professional.

To achieve this comprehensive goal the programme seeks to:

- develop specialized knowledge and understanding about the philosophical and sociological bases of education;
- develop ability to understand human behavior and understanding about the philosophical and sociological bases of education;
- develop ability to understand teaching and learning behavior, capability, knowledge and understanding of teachers and educators.
- develop national and international perspective about educational theory and practice to enable the learners to visualize the inter-linkages and dependency among different educational systems;
- develop a working knowledge of ICT and their application in Formal and Non-formal systems of education for teacher empowerment;
- develop knowledge and understanding of Management, Planning and Financing of education.

- develop managerial and administrative capabilities and skills to effectively manage educational institutions; in conducting research in specialized areas of education and thus generate knowledge or critically evaluate existing knowledge; and
- generate awareness and understanding of some specialized areas of education and human development like Special Needs Education, Curriculum Development, Environmental Education, Vocational Education, Teacher Education, Elementary Education, Measurement and Evaluation, Value Education and Human Responsibility so as to widen their horizon of understanding of modern educational practices.

7.0 Induction and Contact Programme

The Study Centre/MPBOU will organize two days induction meeting at MPBOU and four days at the Study Center in the beginning of the-session after the enrolment. The complete details with explanations about the programme will be discussed in the induction meeting.

Since this M.Ed. Programmed is a research-oriented programme essentially involving a research project and writing a dissertation on it, it entails development of certain skills to enable you to scientifically carry out the research on a topic of your choice and writing its report in the form of a dissertation. You may, therefore, need more focused guidance for development of such skills and for clarification of certain issues and problems associated with the process of research.

Second, to carry out your research project, you need to have practical experience in the development and use of certain tools of research, their administration, scoring and interpretation of the results. These tools of research may be some tests, inventories, questionnaires, scales of measurement etc. These tools of research will enable you to collect necessary evidences, called data, for your dissertation. Such skills can be developed better in a supervised face-to-face manner. To enable you to develop such necessary skills and competencies; there is a provision two contact programme to be organized at the study centre.
